

SUBJECT:	PRUDENTIAL INDICATORS 2017/18 – 2020/21 AND TREASURY MANAGEMENT STRATEGY 2018/19
DIRECTORATE:	CHIEF EXECUTIVE AND TOWN CLERK
REPORT AUTHOR:	SARAH HARDY, GROUP ACCOUNTANT (TECHNICAL AND EXCHEQUER)

1. Purpose of Report

- 1.1 The purpose of the report is for Audit Committee to scrutinise and recommend to the Executive for approval the adoption of the 15 statutory prudential indicators and 8 local indicators for the period 2017/18 to 2020/21 together with the 2018/19 Treasury Management Strategy alongside the Medium Term Financial Strategy 2018-23, prior to their reporting to Council for final approval.

2. Executive Summary

- 2.1 The table below summarises the key prudential indicators which have been incorporated into the 2018/19 strategy. The projected capital expenditure will determine the capital financing or borrowing requirement, which will in turn determine the actual level of external borrowing taken and hence, cash balances available for investment. The figures are based on the draft Medium Term Financial Strategy which will be revised and presented in a final version to full Council as part of the annual budget setting meeting.

Key Prudential Indicators	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Capital Expenditure*				
• General Fund	30,357	1,590	500	500
• HRA	15,204	25,805	14,529	11,386
• Total	45,561	27,395	15,029	11,886
Capital Financing Requirement				
• Non HRA	51,730	51,657	50,727	48,728
• HRA	58,503	58,503	58,503	58,503
• Total	110,233	110,160	109,230	107,231
Net Borrowing	64,513	71,096	64,459	65,499
External debt (borrowing only)	79,354	85,354	85,354	84,499
Investments**				
• Longer than one year	0	0	0	0
• Under one year	15,400	14,600	21,000	19,000
• Total	15,400	14,600	21,000	19,000

* Based on Draft MTFs 2018-23.

- 2.2 The methodology employed for selecting investment counterparties is a multi-stage formula based creditworthiness methodology provided by the Council's treasury management advisors, Link Asset Services. The aim of the investment strategy is to generate a list of highly creditworthy counterparties, allowing the Council to maintain a diversified portfolio of investments which safeguards the cash balances whilst generating a reasonable rate of return. The Link methodology, which incorporates credit ratings, credit outlooks and watches and overlays credit default swaps as a measure of market risk, fully meets the aim of the strategy.
- 2.3 The Strategy for 2018/19 has been prepared taking into account changes in the Prudential Code and Treasury Management Code.

3. Background

- 3.1 This report covers the operation of the Council's prudential indicators, its treasury function and its likely activities for the forthcoming year. It incorporates four key Council reporting requirements:
- **Prudential and Treasury Indicators** – the reporting of the statutory prudential indicators together with local indicators, in accordance with the requirements of the CIPFA Prudential Code for Capital Finance in Local Authorities and the CIPFA Treasury Management Code of Practice.
 - **Minimum Revenue Provision (MRP) Statement** – the reporting of the MRP policy which sets out how the Council will pay for capital assets through revenue each year (as required by regulation under the Local Government 2003)
 - **Treasury Management Strategy** – which sets out how the Council's treasury activity will support capital decisions, the day-to-day treasury management and the limitations on activity through treasury prudential indicators. The key indicator is the **Authorised Limit**, the maximum amount of debt the Council could afford in the short term, but which would not be sustainable in the longer term. This is the Authorised Borrowing Limit required by s3 of the Local Government Act 2003 and is in accordance with the CIPFA Code of Practice on Treasury Management and the CIPFA Prudential Code.
 - **Investment Strategy** – this is included within the Treasury Management Strategy and sets out the criteria for choosing investment counterparties and limiting exposure to the risk of loss. It is reported annually (in accordance with Department of Housing, Communities and Local Government (DHCLG) Investment Guidance).

4. Treasury Management Requirements 2018/19

4.1 The Capital Prudential Indicators 2017/18 – 2020/21

- 4.1.1 The Council's capital expenditure plans are one of the key drivers of treasury management activity. The outputs of the capital expenditure plans are reflected in prudential indicators, which are designed to assist members to overview and confirm capital expenditure plans. The Local Government Act 2003 requires the

Council to adopt the CIPFA Prudential Code and to produce prudential indicators. The Prudential Code requires the Council to approve as a minimum the statutory indicators and limits. This report revises the indicators for 2017/18 and details them for 2018/19 to 2020/21. An explanation and calculation of each Prudential Indicator is provided in **Appendix 1** and the key messages summarised in section 4.1.3.

4.1.2 Capital Expenditure and Financing

The Council's capital expenditure plans (as detailed in the Draft MTFs 2018-23) are summarised below. Capital expenditure can be paid for immediately (by resources such as capital receipts, capital grants or revenue resources) but if these resources are insufficient, any residual capital expenditure will form a borrowing need. This can be supported by government grant for the repayment of debt (very limited support available) or can be unsupported (prudential borrowing) where the Council needs to identify the resources to finance and repay debt through its own budget.

Indicators 1&2	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Capital Expenditure				
General Fund	30,357	1,590	500	500
HRA (including New Build)	15,204	25,805	14,529	11,386
Total Expenditure	45,561	27,395	15,029	11,886
Financed by:				
Capital receipts	4,383	5,375	2,501	0
Capital grants & contributions	3,702	420	300	300
Depreciation (HRA only)	13,957	18,168	12,028	11,386
Revenue/Reserve Contributions	468	2,612		
Borrowing need	23,041	820	200	200

4.1.3 The Council's Borrowing Need - the Capital Financing Requirement (CFR)

The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either capital or revenue resources. It is essentially a measure of the Council's underlying borrowing need. Based on the capital expenditure plans in paragraph 4.1.2 the CFR for 2017/18 to 2020/21 is projected to be:

Indicators 3&4	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Capital Financing Requirement				
General Fund	51,730	51,657	50,727	48,728
HRA	58,503	58,503	58,503	58,503
Total CFR @ 31 March	110,233	110,160	109,230	107,231
Net movement in CFR	21,557	-73	-930	-1,999
Actual debt (borrowing & other liabilities)	79,913	85,696	85,459	84,499

Indicators 3&4	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	
Net borrowing need for the year	23,041	820	200	200
Return of LAMS deposit	-1,000	0	0	0
Minimum Revenue Provision (MRP)	-334	-743	-980	-1,194
Repayment of GENF borrowing				-855
Application of Capital Receipts to reduce CFR	-150	-150	-150	-150
Movement in CFR	21,557	-73	-930	-1,999

The CFR also includes any other long term liabilities (e.g. finance and embedded leases) brought onto the balance sheet. Whilst this increases the CFR, and therefore the Council's borrowing requirement, these types of scheme include a borrowing facility, so the Council is not required to separately borrow for them. The Council has £0.559m of such leases within the CFR in 2017/18 reducing to £0.105m by the end of 2019/20. The CFR does not yet include any allowance for the planned replacement of the majority of the vehicle fleet under leasing. If following a full financing options appraisal the most cost effective funding method is identified as either borrowing or finance lease then the CFR will be increased to reflect a borrowing requirement for the replacement fleet.

- 4.1.4 **Limits on Borrowing** – In order to ensure that borrowing decisions are based on consideration of affordability, prudence and sustainability and that treasury management decisions are taken in accordance with good professional practice, in full understanding of the risks involved and how these risks will be managed to levels that are acceptable to City of Lincoln Council, the Prudential Code requires that Council's set limits on borrowing activity.

Limiting Borrowing for Capital Purposes - the Council needs to ensure that its total borrowing net of any investments, does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for the current and next two financial years. The Chief Finance Officer reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future.

Operational Boundary for External Debt – boundary based on the expected maximum external debt during the course of the year

Authorised Limit for External Debt - represents the limit beyond which external debt is prohibited. It represents the level of debt, which while not desired, could be afforded in the short term, but is unsustainable in the long term. This limit needs to be set or revised by full Council.

The level of the proposed operational and authorised limits is based on an assessment of the level of borrowing required to meet the Capital Financing

Requirement (CFR) and also an allowance for temporary borrowing for working capital and also in lieu of other capital financing sources (e.g. capital receipts). Financial modelling has been carried out for both and the affordability and sustainability of the potential borrowing requirement has been assessed and can be contained within the Draft MTFS 2018-23. This is reflected in the table below and in the Prudential Indicators 7 and 8 tables in Appendix 1.

Indicator 7	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Authorised limit				
Borrowing	120,000	130,000	130,000	130,000
Other long term liabilities	2,500	1,800	1,300	800
Total Authorised limit	122,250	131,800	131,300	130,800

4.2 Minimum Revenue Provision (MRP) Policy

- 4.2.1 The Council is required to pay off an element of the accumulated General Fund borrowing each year (the CFR) through a revenue charge - the Minimum Revenue Provision (MRP), and is also allowed to undertake additional voluntary payments (VRP). No revenue charge is currently required for the HRA. However, under self-financing, the HRA is now required to charge depreciation on its assets, which has been built into the revenue charges in the HRA 30 year Business Plan.

The Department of Communities and Local Government have issued statutory guidance on the options available for making prudent provision for the repayment of debt. The Council must have regard to this guidance. The guidance is not prescriptive and makes it clear that councils can follow an alternative approach, provided they still make a prudent provision. The broad aim of a 'prudent provision' is to ensure that debt is repaid over a period that is reasonably commensurate with that over which the capital expenditure provides benefits to service delivery.

Guidance issued by the Secretary of State requires that before the start of each financial year the Council prepares a statement of its policy on making MRP in respect of the forthcoming financial year and submits it to Full Council for approval. There are no changes proposed to the MRP policy for 2018/19.

The MRP policy statement is set out in **Appendix 2**.

4.3 The Treasury Management Strategy 2018/19

- 4.3.1 Treasury Management is an important part of the overall financial management of the Council's affairs. The treasury management service performs the borrowing and investment activities of the Council and effectively manages the associated risks. Its activities are strictly regulated by statutory requirements and a professional code of practice (the CIPFA Code of Practice on Treasury Management). The Treasury Management Policy and Practices and the annual Treasury Management Strategy provides the operational rules and limits by which day to day treasury management decisions are made.

4.3.2 The Treasury Management Strategy for 2018/19 is attached at **Appendix 3**. The strategy outlines expected treasury activity for the coming year and expected prudential indicators relating the treasury management for the next three years. The key principals in the strategy are summarised below.

- **Debt and Investment Projections (Treasury Management Strategy section 2)** – based on the budgeted borrowing requirements, estimated balances and cash flow, year-end debt and investment projections are:

	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
External Debt				
Debt at 31 March (including other long term liabilities)	79,913	85,696	85,459	84,499
Investments				
Total Investments at 31 March	15,400	14,600	21,000	19,000

- **Expected Movement in Interest Rates (Treasury Management Strategy section 3)** - short term interest rates are not expected to rise until 2019/20 and then will rise slowly in future years. Long term rates for external borrowing are not expected to rise until December 2017 and then only marginally. After this they will continue to rise very slowly in future years.
- **Borrowing & Debt Strategy (Treasury Management Strategy section 4)** - The main aims are:
 - To reduce the revenue costs of debt
 - To manage the Council's debt maturity profile
 - To effect funding at the cheapest cost commensurate with future risk.
 - To forecast average future interest rates and borrow accordingly
 - To proactively reschedule debt in order to take advantage of potential savings as interest rates change.
 - To manage the day-to-day cash flow of the Authority in order to, where possible, negate the need for short-term borrowing.
- **Investment Strategy (Treasury Management Strategy section 5)** - The Council's investment strategy primary objectives are safeguarding the repayment of the principal and interest of its investments on time, then ensuring adequate liquidity, with investment return being the final objective.

The current investment climate continues to present one over-riding risk consideration, that of counterparty security risk. In order to fully consider counterparty risk factors when selecting investment counterparties, the Council employs the multi-stage formula based creditworthiness methodology provided by the Council's treasury management advisors, Link Asset Services. This methodology, developed by Link, uses credit ratings as the core criteria but also incorporates other market information on a mathematical basis. The methodology is continuously reviewed and changes are made in response to changes made by the credit rating agencies. There haven't been any major changes made to the credit rating methodology since last year's change when any reference to the implied levels of sovereign support (which

were phased out last year) were taken out. The current methodology is explained in detail in the Council's Investment Strategy 2018/19 in **Section 5 of Appendix 3**.

The aim of the investment strategy is to generate a list of highly creditworthy counterparties which will also enable diversification and thus avoidance of concentration risk (i.e. placing a large proportion of investments with a small number of counterparties). The intention of the strategy is to provide security of investment and minimisation of risk.

Investment instruments identified for use are listed in **Appendix 3** under the specified and non-specified investments categories. Counterparty limits will be as shown in **Appendix 3**. Examples of institutions which currently fall under the various colour coded categories are as follows:

- Blue (part-government owned - 1 year)
- Orange (1 year)
- Green (100 days)
- Yellow (5 years) – Local Authorities.

Sole reliance will not be placed on the use of this external service. In addition, officers will also use market data and market information, information on government support for banks and the credit ratings of that supporting government.

The criteria to be used to select investment counterparties are set out in Appendix 3. These include:-

- Maintenance of a counterparty list with approved credit ratings and time and principal limits
- Regular monitoring of counterparties with the help of the Council's treasury management advisors
- Limits on the amounts on non-specified investments (e.g. over 1 year investments)
- Limits on non-UK counterparties

Risk Benchmarking – The revised CIPFA Code and the CLG Investment Guidance adopted 2nd March 2010 introduced the consideration and approval of security and liquidity benchmarks. The Investment Strategy for 2018/19 includes the following benchmarks for liquidity and security:-

Liquidity – The Council's bank overdraft limit is nil. The Council will seek to maintain liquid short-term deposits of at least £5,000,000 available with a week's notice. The weighted average life (WAL) of investments is expected to be 0.45years.

Security – the Council's expected security risk benchmark from its budgeted investment strategy is 0.008% historic risk of default when compared to the whole portfolio. This means that the risk amounts to approximately £0.001m on the expected investment portfolio of £14.6 million.

- **Treasury Limits on Activity (Treasury Management Strategy section 6)** – This section includes statutory and local indicators covering treasury management activity. These include limits on fixed and variable interest rate exposure, maturity structure of debt and performance targets for interest rates on new investments and loans.
- **Breakdown of Investment Categories (Treasury Management Strategy section 7)** – covers authorised posts for treasury management activities

The need to limit the risk to the Council of loss from counterparty failure results in a restricted range of counterparties available for investment.

4.4 Treasury Management Practices

The Council adopted the CIPFA Code of Practice on Treasury Management (which was revised December 2017) on 2nd March 2010. At this time the Treasury Management Policy Statement was also adopted. The Treasury Management Policy and Practices (TMP's) are updated annually to reflect the Treasury Management Strategy approved by Council and to reflect any changes in staffing structures or working practices of the treasury function.

A copy of the Treasury Management Practices are attached to this report as Appendix 4.

5. Organisational Impacts

5.1 Finance

Financial implications are contained in the main body of the report.

5.2 Legal Implications

The Treasury Management Strategy and Prudential Indicators meet the requirements under legislation and code of practice.

6. Risk Implications

The risk implications are contained within the body of the report.

7. Recommendations

7.1 Audit Committee are recommended to:

7.2 Review and recommend for approval by the Executive and Council the prudential indicators detailed in section 4.1 and appendix 1 of the report.

7.3 Review and recommend for approval by Executive and Council the Treasury Management Strategy (including the treasury management prudential indicators and the Investment Strategy) set out section 4.3 and appendix 3 of the report.

Is this a key decision? Yes

Do the exempt information categories apply? No

Does Rule 15 of the Scrutiny Procedure Rules (call-in and urgency) apply? No

How many appendices does the report contain? 4

Prudential Indicators 2017/18 – 2020/21

1.0 Introduction

- 1.1 The Local Government Act 2003 requires the Council to adopt the CIPFA Prudential Code and to produce prudential indicators. The Code sets out a framework for self-regulation of capital spending, in effect allowing councils to invest in capital projects without any limit as long as they are affordable, prudent and sustainable. The Prudential Code operates by the provision of prudential indicators, which highlight particular aspects of the capital expenditure planning. This report revises the indicators for 2017/18 and details them for 2018/19-2020/21. Each indicator either summarises the expected capital activity or introduces limits upon the activity, and reflects the outcomes of the Council's underlying capital appraisal systems.
- 1.2 The Prudential Code requires the Executive and full Council to approve as a minimum the 15 statutory indicators. The Chief Finance Officer has added 8 local indicators that are believed to add value and assist understanding of the main indicators.
- 1.3 The purpose of the indicators is to provide a framework for capital expenditure decision-making. It highlights, through the prudential indicators, the level of capital expenditure, the impact on borrowing and investment levels and the overall controls in place to ensure the activity remains affordable, prudent and sustainable.
- 1.4 Within this overall capital expenditure framework there is a clear impact on the Council's treasury management activity, either through increased borrowing levels or the investment of surplus balances. As a consequence the treasury management strategy for 2018/19 (see Appendix 3) includes the expected treasury management activity, together with the 5 specific Prudential indicators and 8 local indicators, which relate to treasury management.
- 1.5 The 15 statutory prudential indicators can be categorised under the following four headings:
- Capital Expenditure and External Debt (numbers 1, 2, 3, 4, 5, 7, 8)
 - Prudence (number 6)
 - Affordability (numbers 9,10)
 - Treasury Management limits (numbers 11, 12, 13, 14, 15)
- (The numbers above relate to the reference given to each indicator).
- 1.6 The paragraphs 2 to 4 below detail the 10 statutory indicators under the headings of Capital Expenditure/External Debt, Prudence and Affordability. The remaining 5 statutory and 8 local indicators relating to the treasury management strategy are set out in appendix 3.

2.0 Capital Expenditure Prudential Indicators

- 2.1 The Council's capital expenditure plans are summarised below and this forms the first of the prudential indicators. This expenditure can be paid for immediately (by

resources such as capital receipts, capital grants etc.), but if resources are insufficient any residual expenditure will form a borrowing need.

2.2 A certain level of capital expenditure may be supported by government grant; any decisions by Council to spend above this level will be unsupported and will need to be paid for from the Council's own resources. This unsupported capital expenditure needs to have regard to:

- Service objectives e.g. strategic planning
- Stewardship of assets e.g. asset management planning
- Value for money
- Prudence and sustainability e.g. implications for external borrowing and whole life costing
- Affordability
- Practicality e.g. achievability of plan

The revenue consequences of capital expenditure, particularly the unsupported expenditure, will need to be paid for from the Council's own resources.

The Government retains an option to control either the total of all councils' plans, or those of a specific council, although no control has yet been required.

2.3 The key risks to the plans are that some estimates for sources of funding, such as capital receipts, may be subject to change over this timescale. For instance, anticipated asset sales may be postponed due to the impact of the recession on the property market.

2.4 The summary capital expenditure and financing projections are shown in the table below.

Indicators 1&2	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Capital Expenditure				
General Fund	30,357	1,590	500	500
HRA (including New Build)	15,204	25,805	14,529	11,386
Total Expenditure	45,561	27,395	15,029	11,886
Financed by:				
Capital receipts	4,383	5,375	2,501	0
Capital grants & contributions	3,702	420	300	300
Depreciation (HRA only)	13,957	18,168	12,028	11,386
Revenue/Reserve Contributions	478	2,612		
Borrowing need	23,041	820	200	200

3.0 External Debt and Prudence Prudential Indicators

3.1 **Borrowing Need** - The Council's Capital Financing Requirement (CFR) represents the Council's borrowing need. The CFR is simply the total outstanding capital expenditure, which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's underlying borrowing need. The capital expenditure above which has not immediately been paid for will increase the CFR.

3.2 The CFR also includes any other long term liabilities (e.g. finance and embedded leases) brought on to the balance sheet. Whilst this increases the CFR, and therefore the Council's borrowing requirement, they are purely accounting adjustments and include a borrowing facility, so the Council is not required to separately borrow for them. The Council has £0.559m of such leases within the CFR in 2017/18 reducing to £0.105m by the end of 2019/20. The CFR does not yet include any allowance for the planned replacement of the majority of the vehicle fleet under leasing arrangements.

3.3 Capital Financing Requirement projections are detailed below:

Indicators 3&4	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Capital Financing Requirement				
General Fund	51,730	51,657	50,727	48,728
HRA	58,503	58,503	58,503	58,503
Total CFR @ 31 March	110,233	110,160	109,230	107,231
Net movement in CFR	21,557	-73	-930	-1,999
Actual debt (borrowing & other liabilities)	79,913	85,696	85,459	84,499
Net borrowing need for the year	23,041	820	200	200
Return of LAMS deposit	-1,000	0	0	0
Minimum Revenue Provision (MRP)	-334	-743	-980	-1,194
Repayment of GENF borrowing				-855
Application of Capital Receipts to reduce CFR	-150	-150	-150	-150
Movement in CFR	21,557	-73	-930	-1,999

* MRP = Minimum Revenue Provision – Statutory requirement to annually fund the repayment of General Fund borrowing.

3.4 **Estimates of External Debt** - The expected impact of the capital expenditure decisions on the Council's net debt position is shown below:

Indicator 5	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
External Debt				
Gross Borrowing	79,354	85,354	85,354	84,499
Other Long Term Liabilities*	559	342	105	0
Total Debt at 31 March	79,913	85,696	85,459	84,499

*Other Long Term liabilities include finance leases

- 3.5 The expected movement in the CFR over the next three years is dependent on the level of capital borrowing taken during the budget cycle. Such borrowing is the capital expenditure freedom allowed under the Prudential Code i.e. prudential borrowing which allows the freedom to enter into projects such as spend to save schemes, or decisions to allocate additional resources from revenue to capital to enable service enhancements (subject to affordability).
- 3.6 There are two limiting factors on the Council's ability to undertake prudential borrowing:
1. Whether the revenue resource is available to support in full the implications of capital expenditure, both borrowing costs and running costs. Can the Council afford the implications of the capital expenditure?
 2. The Government may use a long stop control to ensure that either the total of all the Councils' plans do not jeopardise national economic policies, or in the event of an assessment by Central Government that local plans are unaffordable at a council, it may implement a specific control to limit its capital expenditure plans. No such control has been implemented during 2017/18.
- 3.7 **Limits to Borrowing Activity** - Within the prudential indicators there are a number of key indicators to ensure the Council operates its activities within well-defined limits.
- 3.8 For the first of these the Council needs to ensure that its total borrowing net of any investments, does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2018/19 and next two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue purposes.

Indicator 6	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Gross Borrowing	79,913	85,696	85,459	84,499
Investments	15,400	14,600	21,000	19,000
Net Borrowing	64,513	71,096	64,459	65,499
CFR	110,233	110,160	109,230	107,231
Net Borrowing is below CFR	45,720	39,064	44,771	41,732

The Chief Finance Officer reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

- 3.9 A further two key prudential indicators control or anticipate the overall level of borrowing, these are:

- **The Authorised Limit for External Debt** – This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by full Council. It reflects the level of external debt, which while not desired, could be afforded in the short term, but is not sustainable in the longer term. This is the statutory limit determined under section 3(1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although no control has yet been exercised.
- **The Operational Boundary for External Debt** – This indicator is based on the expected maximum external debt during the course of one year; it is not a limit and actual borrowing could vary around the boundary for short times during the year.

The level of the proposed operational and authorised limits is based on an assessment of the level of borrowing required to meet the Capital Financing Requirement (CFR) and also an allowance for temporary borrowing for working capital and also in lieu of other capital financing sources (e.g. capital receipts). The limits proposed for the 2018/19 Treasury Management Strategy also allow for the borrowing requirement associated with the Lincoln Transport Hub scheme and the purchase of Broadgate Carpark. The affordability and sustainability of the borrowing requirement for both have been assessed and can be contained within the Draft MTFs 2018-23. The operational and authorised limits for 2018/19 have been set to allow these.

Indicator 7	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Authorised Limit				
Borrowing	120,000	130,000	130,000	130,000
Other long term liabilities*	2,500	1,800	1,300	800
Total Authorised Limit	122,250	131,800	131,300	130,800

Indicator 8	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Operational Boundary				
Borrowing	115,000	123,000	122,000	120,000
Other long term liabilities*	2,000	1,600	1,100	700
Total Operational Boundary	117,000	124,600	123,000	120,700

*Other Long Term liabilities include finance leases

3.10

Borrowing in advance of need – The Council has some flexibility to borrow funds this year for use in future years. The Chief Finance Officer may do this under delegated power where, for instance, a sharp rise in interest rates is expected, and so borrowing early at fixed interest rates will be economically beneficial or meet budgetary constraints. Whilst the Chief Finance Officer will adopt a cautious approach to any such borrowing, where there is a clear business case for doing so borrowing may be undertaken to fund the approved capital programme or to fund future debt

maturities. Borrowing in advance will be made within the constraints that:

- It will be limited to no more than 75% of the expected increase in borrowing need (CFR) over the three year planning period; and
- Would not look to borrow more than 36 months in advance of need

3.11 Risks associated with any advance borrowing activity will be subject to appraisal in advance and subsequent reporting through the mid-year or annual reporting mechanism.

4.0 Affordability Prudential Indicators

4.1 The 8 statutory indicators above cover the overall capital and control of borrowing, but in addition, within this framework, there are further indicators that assess the affordability of the capital investment plans. These indicators provide an indication of the impact of the capital investment plans on the Council's overall finances and these are shown below:

4.2 **Actual and Estimates of the Ratio of Financing Costs to Net Revenue Stream (Indicators 9 & 10)** – This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream. The estimates of financing costs include current commitments and the proposals in this budget. The General Fund financing costs increase across the MTFS period. This reflects the need to borrow to support the capital programme.

The HRA financing costs decrease very marginally year on year. As there is no planned borrowing to fund the capital programme this has no impact on the financing costs over the four year period.

Neither the General Fund nor the HRA indicators include the effect of replacing some of the finance leases for vehicles replaced in 2015/16 and 2016/17 yet. This may increase the interest charges if finance leasing or borrowing if it is the most cost effective method of financing.

Indicators 9 & 10	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
General Fund	12.6%	13.4%	17%	18.6%
HRA	45.6%	44.4%	43.4%	42.8%

4.3 **Estimates of the incremental impact of capital investment decisions on the Council Tax** – This indicator has been discontinued following an update to the code in December 2017.

4.4 **Estimates of the incremental impact of capital investment decisions on Housing Rent Levels** – This indicator has been discontinued following an update to the code in December 2017.

Minimum Revenue Provision (MRP) Policy

1.0 The Council is required to pay off an element of the accumulated General Fund borrowing each year through a revenue charge (the Minimum Revenue Provision), and is also allowed to undertake additional voluntary payments (VRP).

1.1 CLG Regulations have been issued which require full Council to approve **an MRP Statement** in advance of each year. A variety of options are provided so long as there is a prudent provision.

1.2 Members are recommended to approve the following MRP Statement:

For capital expenditure incurred:

(A) Before 1st April 2008 or which in the future will be Supported Capital Expenditure, the MRP policy will be:

Existing practice - MRP will follow the existing practice outline in former DHCLG Regulations, but on a 2% straight-line basis, i.e. provision for the full repayment of debt over 50 years;

(B) From 1st April 2008 for all unsupported borrowing (including finance leases) the MRP policy will be:

Asset Life Method – MRP will be based on the estimated life of the assets on either a straight line or annuity basis (as deemed most appropriate for capital expenditure being financed through borrowing). Asset life is deemed to begin once the asset becomes operational. MRP will commence from the financial year following the one in which the asset becomes operational.

MRP in respect of unsupported borrowing taken to meet expenditure, which is treated as capital expenditure by virtue of either a capitalisation direction or regulations, will be determined in accordance with the asset life method as recommended by the statutory guidance.

(C) The Council will set aside £750k of capital receipts to the Capital Adjustment Account instead of applying these receipts to new expenditure in order to reduce the total debt liability (this will be £150k per annum over the period 2017/18 to 2021/22). The Council will reduce the MRP provision for the year by the same amount.

(D) Expenditure in respect of land purchases will increase the Capital Financing Requirement (CFR) by the borrowing required to fund the purchase which will be repaid by the future sale of the asset. Once the asset is sold and the funds are realised they will be classed as a capital receipt and will be off-set against the CFR which will reduce accordingly. As the funds will be returned in full there is no need to set aside prudent provision to repay the debt liability so no MRP will be applied in respect of this type of purchase.

Treasury Management Strategy 2018/19

1.0 Introduction

- 1.1 Treasury Management is an important part of the overall financial management of the Council's affairs. Its importance has increased as a result of the freedoms provided by the Prudential Code. The 12 prudential indicators in Appendix 1 cover the affordability and impact of capital expenditure decisions and set out the Council's overall capital framework. The treasury service considers the effective funding of these decisions. Together they form part of the process which ensures the Council meets its balanced budget requirement under the Local Government Finance Act 1992. There are 5 specific statutory treasury management prudential indicators and 8 local indicators.
- 1.2 The treasury management service performs the borrowing and investment activities of the Council and effectively manages the associated risks. Its activities are strictly regulated by statutory requirements and a professional code of practice (the CIPFA Code of Practice on Treasury Management - Revised December 2017). The adoption of the Code is one of the 12 statutory Prudential Indicators. This Council adopted the Code of Practice on Treasury Management on 2nd March 2010. As a result of adopting the Code, the Council also adopted a Treasury Management Policy Statement on 2nd March 2010.
- 1.3 The policy requires an annual strategy to be reported to Council outlining the expected treasury activity for the forthcoming year and includes prudential indicators relating specifically to Treasury Management for the next three years. Further reports are produced; a mid-year monitoring report and a year-end report on actual activity for the year (Annual Treasury Management Stewardship Report). In addition, Treasury Management Practice (TMPs) documents are also maintained by the Chief Finance Officer. The TMPs have been reviewed and updated to reflect any changes in the Treasury Management Strategy and are attached as appendix 4.
- 1.4 A key requirement of this report is to explain both the risks, and the management of the risks, associated with the treasury service. This strategy covers:
- The Council's debt and investment projections;
 - The expected movement in interest rates;
 - The Council's borrowing strategy;
 - The Council's investment strategy;
 - Treasury Management prudential indicators and limits on activity;
 - Local Treasury issues

2.0 Debt and Investment Projections 2017/18 – 2020/21

- 2.1 The borrowing requirement comprises the expected movement in the Capital Financing Requirement (CFR) and any maturing debt that will need to be re-financed. The table below shows the anticipated effect on the treasury position over the current and next three years based on the current capital programme. The expected maximum debt position during each year represents the Operational Boundary prudential indicator (for borrowing only) and so may be different from the year-end position. It also highlights the expected change in investment balances.

	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
External Debt				
Debt at 1 April	75,354	79,354	85,354	85,354
Expected change in debt	4,000	6,000	0	(855)
Debt at 31 March	79,354	85,354	85,354	84,499
Operational Boundary (debt only)	115,000	123,000	122,000	120,000
Investments				
Total Investments at 31 March	15,400	14,600	21,000	19,000
Investment change	(8,000)	(800)	6,400	(2,000)

Expected borrowing has been profiled to take out loans before current low borrowing interest rates are forecast to rise.

2.2 The related impact of the above movements on the revenue budgets are:

	2017/18 Revised £'000	2018/19 Estimated £'000	2019/20 Estimated £'000	2020/21 Estimated £'000
Revenue Budgets				
Total interest payable on borrowing	3,140	3,120	3,255	3184
Related HRA charge	2,352	2,352	2,352	2,332
Net General Fund interest payable	788	848	903	852
Total investment income	113	77	132	149
Related HRA income share	31	31	32	38
Related to other commitments	19	17	17	17
Net General Fund income	63	29	83	94

3.0 Prospects for Interest Rates

The Council has appointed Link Asset Services as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates.

The following table gives the Link central view and paragraph 3.1 give Link's view on economic prospects.

Annual Average %	Bank Rate	PWLB Rates*		
		5 year	25 year	50 year
March 2018	0.50	1.60	2.90	2.60
March 2019	0.75	1.80	3.10	2.90
March 2020	1.00	2.10	3.40	3.20
March 2021	1.25	2.30	3.60	3.40

* Borrowing Rates

3.1 Economic Growth (Link's view)

UK. After the UK surprised on the upside with strong economic growth in 2016, **growth in 2017 has been disappointingly weak**; quarter 1 came in at only +0.3% (+1.8% y/y), quarter 2 was +0.3% (+1.5% y/y) and quarter 3 was +0.4% (+1.5% y/y). The main reason for this has been the sharp increase in inflation, caused by the devaluation of sterling after the EU referendum, feeding increases in the cost of imports into the economy. This has caused, in turn, a reduction in consumer disposable income and spending power and so the services sector of the economy, accounting for around 80% of GDP, has seen weak growth as consumers cut back on their expenditure.

The **Monetary Policy Committee, (MPC), meeting of 14th September 2017** surprised financial markets and forecasters by warning that the Bank Rate would need to rise soon. At the 2nd November meeting the MPC increased the Bank Rate by 0.25% to 0.50% and gave forward guidance that they expected to increase rates only twice more in the next three years to reach 1% by 2020.

The other key factor in forecasts for Bank Rate is **inflation** where the MPC aims for a target for CPI of 2.0%. The Bank of England have indicated that it expects CPI inflation to peak at just under 3% in 2017 before falling back to near its target rate in two years' time.

While there is so much uncertainty around the Brexit negotiations, consumer confidence, and business confidence to spend on investing, it is difficult to be confident about how the next two to three years will actually turn out.

USA. Growth in the American economy was notably erratic and volatile in 2015 and 2016. 2017 is following that path again with quarter 1 coming in at only 1.2% but quarter 2 rebounding to 3.1% and quarter 3 coming in at 3.2%. Unemployment in the US has also fallen to the lowest level for many years, reaching 4.1%, while wage inflation pressures, and inflationary pressures in general, have been building. The Fed has started on a gradual upswing in rates with four increases in all and four increases since December 2016; the latest rise was in December 2017 and lifted the central rate to 1.25 – 1.50%. There could then be another four increases in 2018. At its September meeting, the Fed said it would start in October to gradually unwind its \$4.5 trillion balance sheet holdings of bonds and mortgage backed securities by reducing its reinvestment of maturing holdings.

EZ. Economic growth in the Eurozone (EZ), has been lack lustre for several years after the financial crisis despite the ECB eventually cutting its main rate to -0.4% and embarking on a massive programme of Quantitative Easing (QE). However, growth picked up in 2016 and has now gathered substantial strength and momentum thanks to this stimulus. GDP growth was 0.6% in quarter 1 (2.1% y/y), 0.7% in quarter 2 (2.4% y/y) and +0.6% in quarter 3 (2.6% y/y). However, despite providing massive monetary stimulus, the European Central Bank is still struggling to get inflation up to its 2% target and in November inflation was 1.5%. It is therefore unlikely to start on an upswing in rates until possibly 2019. It has, however, announced that it will slow down its monthly QE purchases of debt from €60bn to €30bn from January 2018 and continue to at least September 2018.

Asia. Economic growth in China has been weakening over successive years, despite repeated rounds of central bank stimulus; medium term risks are increasing. Major progress still needs to be made to eliminate excess industrial capacity and the stock of unsold property, and to address the level of non-performing loans in the banking and credit systems.

Japan. GDP growth has been gradually improving during 2017 to reach an annual figure of 2.1% in quarter 3. However, it is still struggling to get inflation up to its target of 2%, despite huge monetary and fiscal stimulus. It is also making little progress on fundamental reform of the economy.

4.0 The Council's Borrowing and Debt Strategy 2018/19

- 4.1 The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need (the CFR), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as investment returns are low and counterparty risk is high and will be maintained for the borrowing.
- 4.2 Against this background and the risks within the economic forecast, caution will be adopted with the 2018/19 treasury operations. The Chief Finance Officer will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances as follows.
- 4.3 If it was felt that there was a significant risk of a sharp fall in long term rates e.g. due to a marked increase of risks around a relapse into recession or of risks of deflation, then long term borrowings will be postponed, and potential rescheduling from fixed rate funding into short term borrowing will be considered.
- 4.4 If it was felt that there was a significant risk of a much sharper rise in long and short term rates than that currently forecast, perhaps arising from a greater than expected increase in world economic activity or a sudden increase in inflation risks, then the portfolio position will be re-appraised with the likely action that fixed rate funding will be drawn whilst interest rates are still relatively cheap.
- 4.5 The Council's overall core borrowing objectives will remain uniform and follow a similar pattern to previous years as follows:
- To reduce the revenue costs of debt in line with the targets set for the Chief Finance officer (see local indicators).
 - To manage the Council's debt maturity profile, leaving no one future year with a high level of repayments that might cause problems in re-borrowing.
 - To effect funding at the cheapest cost commensurate with future risk.
 - To forecast average future interest rates and borrow accordingly i.e. short term/variable when rates are 'high', long term/fixed when rates are 'low'.
 - To monitor and review the level of variable rate loans in order to take greater advantage of interest rate movements.
 - To proactively reschedule debt in order to take advantage of potential savings as interest rates change. Each rescheduling exercise will be considered in terms of the effect of premiums and discounts on the General Fund and the Housing Revenue Account.
 - To manage the day-to-day cash flow of the Council in order to, where possible, negate the need for short-term borrowing. However, short-term

borrowing will be incurred, if it is deemed prudent to take advantage of good investment rates.

- 4.6 There is unsupported borrowing in the General Fund Investment Programme (GIP) as detailed in the MTFS. The Council expects to take out loans for the General Fund before current low borrowing interest rates are forecast to rise significantly, and it will continue to use internal balances whilst interest rates on investments remain low. Officers are continually evaluating the cost effectiveness of borrowing as opposed to selling capital assets. Proposals are presented to Members when borrowing becomes more cost effective.
- 4.7 There are currently no plans to borrow for the HRA planned new build programme during the next MTFS period, starting in 2018/19. It is planned to fund the programme using alternative sources of funding.
- 4.8 The strategy allows for additional borrowing in line with the expected movement in the Capital Financing Requirement (CFR), should it become necessary for cash flow requirements. The Council will consider PWLB loans, Market loans, the Municipal Bond Agency and other financial institutions, if attractive rates are offered. In addition, should schemes be identified that benefit the Council's strategic aims and be deemed cost effective, i.e. Invest to Save schemes where the income streams more than pay for the borrowing costs, unsupported borrowing will be considered.

5.0 The Council's Investment Strategy 2018/19

- 5.1 The Council's investment strategy's primary objectives are safeguarding the repayment of the principal and interest of its investments on time, ensuring adequate liquidity, with the investment return being the final objective.

The intention of the strategy is to provide security of investment and minimisation of risk.

The aim of the strategy is to generate a list of highly creditworthy counterparties which will also enable diversification and thus avoidance of concentration risk.

In line with this aim, the Council will ensure:

- It maintains a policy covering the types of specified and unspecified investments it will invest in, criteria for choosing investment counterparties with adequate security and monitoring their security. This is set out in the paragraphs below.
 - **Specified Investments** – these are high security investments (i.e. high credit quality) and high liquidity investments in sterling with a maturity of no more than one year.
 - **Non-specified Investments** – investments that do not fall into the category of Specified Investments, representing a potential greater risk (e.g. over one year).
- It has sufficient liquidity in its investments. For this purpose it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council's prudential indicators covering the maximum principal sums invested.

5.2 Risk benchmarking

Yield benchmarks are widely used to assess investment performance. Discrete security and liquidity benchmarks are also requirements to Treasury Management reporting, although the application of these is more subjective in nature. Additional background in the approach taken is shown at the end of this appendix.

5.3 These benchmarks are simple guides to maximum risk and so may be breached from time to time, depending on movements in interest rates and counterparty criteria. The purpose of the benchmark is that officers will monitor the current and trend position and amend the operational strategy to manage risk as conditions change. Any breach of the benchmarks will be reported, with supporting reasons in the Mid-Year or Annual Report.

5.4 Security

The Council's expected security risk benchmark for the current portfolio, when compared to these historic default tables, is:

- 0.008% historic risk of default when compared to the whole portfolio.

5.5 Liquidity

In respect of this area the Council seeks to maintain:

- Bank overdraft - £nil.
- Liquid short term deposits of at least £5 million available with a week's notice.
- Weighted Average Life benchmark is expected to be 0.45 years.

5.6 Yield

Local measure of yield benchmark employed is:

- Investments – return above the 7 day LIBID rate

5.7 Investment Counterparty Selection Criteria

The primary principle governing the Council's investment criteria is the security of its investments although the yield or return on the investment is also a key consideration. After this main principle the Council will ensure:

- It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the Specified and Non-Specified investment sections below.

It has sufficient liquidity in its investments. For the purpose it will set out procedures for determining the maximum periods for which funds may be prudently committed. These procedures also apply to the Council's prudential indicators covering the maximum principal sums invested.

5.8 The Chief Finance Officer will maintain a counterparty list in compliance with the criteria set out in the table contained within this appendix and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to that which chooses Specified and Non-Specified investments as they provide an overall pool of counterparties considered high quality which the

Council may use rather than defining what its investments are.

5.9 Following the Comprehensive Spending Review on the Council's grant funding settlement and the ongoing financial pressures, the identification of savings and income generation are critical to the delivery of the Medium Term Financial Strategy. Treasury Management is an important area for further income generation and therefore, the main theme of the Council's investment strategy must continue to be to maximise interest from investments, after ensuring adequate security and liquidity. The Investment Strategy 2018-19 seeks to achieve this objective by establishing a pool of counterparties available for investment whilst still containing overall risk within acceptable levels.

5.10 The Council uses Link Asset Services' creditworthiness service. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies – Fitch, Moody's and Standard and Poor's.

In accordance with the guidance from the CLG and CIPFA, and in order to minimise the risk to investments, the Council applies minimum acceptable credit criteria in order to generate a list of highly creditworthy counterparties which also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the Short Term and Long Term ratings.

As with previous practice, ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end the Council will engage with its advisors to maintain a monitor on market pricing such as "credit default swaps" and overlay that information on top of the credit ratings. This is fully integrated into the creditworthiness methodology provided by Capita Asset Services. The result is a colour coding system, which shows the varying degrees of suggested creditworthiness.

Alongside the credit ratings other information sources are used and include the financial press, share price and other such information pertaining to the banking sector in order to establish the most robust scrutiny process with regard to the suitability of potential investment counterparties.

The credit ratings of counterparties are supplemented with the following overlays:

- Credit watches and credit outlooks from credit rating agencies;
- Credit Default Swaps (CDS) spreads to give early warning of likely changes in credit ratings;
- Sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which the end product is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to determine the suggested duration for investments. The Council will therefore use counterparties within the following durational bands:

Yellow	5 years
Purple	2 years
Blue	1 year (only applies to part-government owned UK banks)
Orange	1 year
Red	6 months
Green	100 days
No colour	Not to be used

The Link Asset Services creditworthiness service uses a wider array of information than primary ratings alone and by using a risk weighted scoring system, does not give undue preponderance to just one agency's ratings.

- 5.11 Typically, the minimum credit ratings criteria the Council use will be a Short Term rating (Fitch or equivalents) of F1 and a Long Term rating of A-. There may be occasions when the counterparty ratings from one rating agency are marginally lower than these ratings but may still be used. In these instances, consideration will be given to the whole range of ratings available, or other topical market information, to support their use.

The credit ratings specified above are defined as follows:-

F1 (short term rating) – Highest credit quality

A- (long term rating) – High credit quality, denoting a very strong bank

- 5.12 All credit ratings will be monitored regularly. The Council is alerted to changes to ratings of all three agencies through its use of Link's creditworthiness service.

- If a downgrade results in the counterparty no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
- In addition to the use of credit ratings the Council will be advised of information in movements in credit default swap spreads against the iTraxx benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Council's counterparty list.

Sole reliance will not be placed on the use of this external service. In addition the Council will also use market data and market information, information on sovereign support for banks and the credit ratings of that supporting government.

5.13 **Country and sector considerations**

Due care will be taken to consider the country, group and sector exposure of the Council's investments. In part the country selection will be chosen by the credit rating of the Sovereign state. In addition:

- No more than 50% will be placed with any non-UK country at any time (see below).
- Group limits have been set to ensure that the Council is not exposed to excessive risk due to concentration of investments within any one institution or group. These are detailed in the Investment Counterparty Limits table

contained within this appendix.

Although the strategy sets a limit for investment in non-UK countries at no more than 50%, the Council has been operating a tighter operational strategy in the light of the Eurozone difficulties and has not been investing outside the UK. This operational restriction will continue until the problems in the Eurozone economy have been sufficiently resolved.

- 5.14 In the normal course of the Council's cash flow operations it is expected that both Specified and Non-specified investments will be used for the control of liquidity as both categories allow for short-term investments. The Chief Finance Officer will strive to keep investments within the Non-specified category to a prudent level (having regard to security and liquidity before yield). To these ends the Council will maintain a maximum of 75% of investments in Non-specified investments.
- 5.15 The use of longer-term instruments (greater than one year from inception to repayment) will fall in the Non-specified investment category. These instruments will only be used where the Council's liquidity requirements are safeguarded. The investment in longer-term instruments is also limited by the prudential indicator 16 shown in paragraph 6.3, which gives the maximum amount to be invested over 1 year, as well as the limits on the amounts that can be placed with the categories within the non-specified range of investments (see above paragraph 5.14).
- 5.16 Expectations on shorter-term interest rates, on which investment decisions are based, reflect the fact that an increase in the current 0.50% Bank Rate is unlikely until December 2018. The Council's investment decisions are based on comparisons between the rises priced into market rates against the Council's and advisers own forecasts.
- 5.17 There is a clear operational difficulty arising from the ongoing economic conditions. Ideally investments would be invested longer to secure better returns, however uncertainty over counterparty creditworthiness suggests shorter dated investments would provide better security
- 5.18 The criteria for choosing counterparties set out above provide a sound approach to investment in the current difficult market circumstances.

5.19 Sensitivity to Interest Rate Movements

The Council's Statement of Accounts is required to disclose the impact of risks on the Council's treasury management activity. Whilst most of the risks facing the treasury management service are addressed elsewhere in this report (credit risk, liquidity risk, market risk, maturity profile risk), the impact of interest rate risk is discussed but not quantified. The table below highlights the estimated impact of a 0.5% increase/decrease in the average interest rates for investments for next year. That element of the debt and investment portfolios, which are of a longer term, fixed interest rate nature, will not be affected by interest rate changes. There will be no effect on borrowing costs as all the Council's existing debt is fixed rate and the additional borrowing planned will also be fixed rate and has been included within the budget figures in this report at the forecast rate for 2018/19.

£000	2018/19 Estimated + 0.5%	2018/19 Estimated - 0.5%*
Revenue Budgets		
Investment income	76,869	0
Related HRA Income	30,795	0
Net General Fund/Other Income	46,073	0

*The average interest rates on investment are 0.5% so if interest rates fell by this amount they would be zero which would result in no interest being earned

6.0 Treasury Management Limits on Activity

6.1 There are four further treasury activity limits, which were previously prudential indicators. The purpose of these is to contain the activity of the treasury function within certain limits, thereby managing the risk and reducing the impact of an adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunity to reduce costs. The indicators are:

- **Upper limit on variable rate exposure** – this identifies a maximum limit for variable interest rates based upon the debt position net of investments.
- **Upper limit on fixed rate exposure** – Similar to the previous indicator this covers a maximum limit on fixed interest rates.
- **Maturity structures of borrowing** – These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing at the same time and are required for upper and lower limits.
- **Total principal sums invested for periods longer than 1 year** – These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment, and are based on the availability of funds after each year-end.

6.2 In addition the Chief Finance Officer has set eight additional local indicators. The aim of these indicators is to increase the understanding of the treasury management indicators.

6.3 The 4 treasury limits above together with the adoption of the Code of Practice indicators are shown below:

Indicator 11	2018/19 Target £m	2019/20 Target £m	2020/21 Target £m
Upper Limit on variable interest rate exposure	34.1	34.1	33.8

Indicator 12	2018/19 Target £m	2019/20 Target £m	2020/21 Target £m
Upper Limit on fixed interest rate exposure	81.7	80.1	79.7

Indicator 13	2018/19		2019/20		2020/21	
Maturity Structure of fixed borrowing	Lower	Upper	Lower	Upper	Lower	Upper
Under 12 months	0%	40%	0%	40%	0%	40%
12 months to 2 years	0%	40%	0%	40%	0%	40%
2 years to 5 years	0%	60%	0%	60%	0%	60%
5 years to 10 years	0%	80%	0%	80%	0%	80%
10 years and above	10%	100%	10%	100%	10%	100%

Indicator 14	2018/19 £m	2019/20 £m	2020/21 £m
Maximum principal sums invested for longer than 1 year	5	5	5

Indicator 15
CIPFA Code of Practice for Treasury Management in the Public Services (Revised December 2017) adopted by Council on 2nd March 2010.

6.4 The Code of Practice on Treasury Management requires the Council to set performance indicators to assess the adequacy of the treasury management function over the year. The Chief Finance Officer has therefore set 8 local indicators, which are believed to add value and assist the understanding of the main prudential indicators. These indicators are:

- Debt – Borrowing rate achieved against average 7 day LIBOR.
- Investments – Investment rate achieved against average 7 day LIBID.
- Average rate of interest paid on the Councils Debt – this will evaluate performance in managing the debt portfolio to release revenue savings.
- Amount of interest on debt as a percentage of gross revenue expenditure.
- Limit on fixed interest rate investments
- Limit on fixed interest rate debt
- Limit on variable rate investments
- Limit on variable rate debt

6.5 The 8 indicators are shown below:

	2018/19 Target	2019/20 Target	2020/21 Target
Debt - Borrowing rate achieved i.e. temporary borrowing (loans of less than 1 year)	Less than 7 day LIBOR	Less than 7 day LIBOR	Less than 7 day LIBOR

	2018/19 Target	2019/20 Target	2020/21 Target
Investment rate achieved	Greater than 7 day LIBID	Greater than 7 day LIBID	Greater than 7 day LIBID

	2018/19 Target	2019/20 Target	2020/21 Target
Average rate of Interest Paid on Council Debt (%)	4.25%	4.25%	4.25%

	2018/19 Target	2019/20 Target	2020/21 Target
Interest on Debt as a % of Gross Revenue Expenditure	3.4%	3.4%	3.3%

	2018/19 Target	2019/20 Target	2020/21 Target
Upper Limit on fixed interest rate Investments	100%	100%	100%

	2018/19 Target	2019/20 Target	2020/21 Target
Upper Limit on fixed interest rate debt	100%	100%	100%

	2018/19 Target	2019/20 Target	2020/21 Target
Upper Limit on variable interest rate investments	75%	75%	75%

	2018/19 Target	2019/20 Target	2020/21 Target
Upper Limit on variable interest rate debt	40%	40%	40%

6.6 Treasury Management Advisers

The Council uses Link Asset Services as its treasury management consultants. The company provides a range of services which include:

- Technical support on treasury matters, capital finance issues and the drafting of Member reports;
- Economic and interest rate analysis;
- Debt rescheduling advice surrounding the existing portfolio;
- Credit ratings/market information service comprising the three main credit rating agencies.

Whilst the advisers provide support to the internal treasury function, under current market rules and the CIPFA Code of Practice the final decision on treasury matters remains with the Council. This service is subject to regular review.

6.7 Member and Officer Training

The increased Member consideration of treasury management matters and the need to ensure officers dealing with treasury management are trained and kept up to date requires a suitable training process for Members and officers.

This Council has addressed this important issue by:

- Member Training – Our treasury management advisers provided training to the Audit Committee and Budget Review Scrutiny Group prior to the consideration of this year's strategy and review of the Draft MTFS 2018-23. They also provided training to the Performance Scrutiny Committee to support their consideration of the mid-year report. The training needs will be regularly reviewed and updated as necessary in 2018/19.
- Staff Training – training needs for staff engaged in treasury management are addressed through the appraisal process. Training is provided both by the Council's treasury management advisers, other external providers and internally. In addition, the Council encourages staff engaged in treasury to undertake a professional accountancy qualification and ensures that the day-to-day trading is overseen by a professionally qualified accountant following the CIPFA Code of Practice.

7.0 Breakdown of Investment Categories with Maximum Amounts and Periods

The Chief Finance Officer, in accordance with TMP 1 (1) within the Council's Code of Practice, is authorised to invest funds surplus to immediate requirements with the following types of institutions subject to the minimum ratings produced by the three credit rating agencies Fitch, Moody's and Standard & Poor's. The Link Asset Services creditworthiness service is applied to determine a list of suitable counterparties available for investment. The minimum ratings applied by Link Asset Services in compiling their recommended counterparty list are set out in section 5.11 of the investment strategy.

All counterparty ratings are updated on a regular basis on the advice of the Council's Treasury Consultants. Notifications of rating changes are received as they happen.

Investment Counterparty Limits

Institution	Minimum credit criteria/colour band	Maximum limit per group or institution £ million	Maximum maturity period
SPECIFIED INVESTMENTS			
UK Bank ^{*1}	Orange/Blue Red Green	£5 million	1 year 6 months 100 days
Non-UK Banks ^{*1} Sovereign rating AA	Orange Red Green	£5 million	1 year 6 months 100 days
Building Society ^{*2}	Orange Red Green	£5 million	1 year 6 months 100 days
Money Market Fund ^{*3}	Yellow	£5 million	Liquid
UK Government ^{*4}	Yellow	unlimited	6 months
UK Local Authority ^{*4}	Yellow	£2 million	1 year
NON-SPECIFIED INVESTMENTS			
UK Bank ^{*1}	Purple	£5 million	2 years
Non-UK Banks ^{*1} Sovereign rating AA	Purple	£3 million	2 years
Building Society ^{*2}	Purple Yellow	£2 million	2 years 5 years
UK Local Authority ^{*4}	Yellow	£2 million	5 years
Lincoln Credit Union	N/A	£10K	N/A
Council's own bank ^{*5} (operational cash limit in addition to the investment group limit)	N/A	£500K	Overnight

^{*1}Where the term 'Bank' is used, this denotes a UK or European Bank authorised to accept deposits through a bank account incorporated within the UK banking sector. The maximum amount indicated is the 'Group total' and covers the total amount that can be invested when spread over any number of subsidiaries within that group.

^{*2} Where the term Building Society is used, this denotes a UK Building Society.

^{*3} Money market funds are mutual funds that invest in short-term high quality debt instruments. The assets are actively managed within very specific guidelines to offer safety of principal, liquidity and competitive returns. Although money funds are regarded as short-term investments the rating agencies use a classification system based on long-term debt ratings.

^{*4} The UK Government (i.e. HM Treasury and its Executive Agency, the Debt Management Office) and Local Authorities, although not rated as such, are classified as having the equivalent of the highest possible credit rating.

^{*5}This limit covers normal treasury management activities but excludes any deposits received after money market trading has closed. It allows up to £500K of operational cash to be held in the Council's main bank account in addition to the group investment limit for the bank, if the bank is included on the Council's counterparty list.

Approved Investment Instruments

In addition to determining the rating and limits of authorised counterparties TMP 4 “Approved instruments, methods and techniques” within the Council’s Code of Practice requires the Council to define the instruments that the Authority will use in undertaking its Treasury Management activities. In accordance with this, and the investment regime issued as part of the prudential capital finance system, the Instruments that the Chief Finance Officer will consider investing surplus funds in are shown below:

Instruments of Specified Investments *₁

1. Gilt-edged securities issued by the United Kingdom Debt Management Office (UK DMO), an Executive Agency of HM Treasury.
2. Treasury Bills issued by the UK DMO.
3. Deposits with the Debt Management Office Debt Management Account Deposit Facility (DMADF).
4. Deposits with a Local Authority, Parish Council or Community Council.
5. Deposits with Banks and Building Societies (Including opening Business Accounts).
6. Certificates of deposit issued by Banks and Building societies.
7. Pooled investment vehicles (e.g. money market funds)

*₁ To be defined as a Specified Investment the above instruments will have these features common to all:

- Be denominated in Sterling,
- Of not more than 1 year maturity,
- Of longer than 1 year maturity but the Council has the right to be repaid within 12 months,
- For instruments numbered 5 to 7 these must be with institutions of high credit quality.

Instruments of Non-Specified Investments *₂

1. Deposits with Banks, Building Societies and their subsidiaries.
2. The Council’s own banker if it fails to meet the basic credit criteria. In this instance balances will be minimised as far as is possible.
3. Certificates of deposit issued by Banks and Building Societies.

*₂ To be defined as a Non-Specified Investment the above instruments will have these features common to all:

- Denominated in Sterling,
- Of more than 1 year maturity,
- Of less than 1 year maturity with an institution that does not meet the basic security requirements under Specified Investments e.g. a deposit with a non-credit rated Bank or Building Society

Security, Liquidity and Yield benchmarking

Benchmarking and Monitoring Security, Liquidity and Yield in the Investment Service

A requirement for Treasury Management reporting is the consideration and approval of security and liquidity benchmarks.

These benchmarks are targets and so may be breached from time to time. Any breach will be reported, with supporting reasons in the Annual Treasury Report.

Yield – These benchmarks are widely used to assess investment performance. Local measures of yield benchmarks are:

- Investments – Internal returns above the 7 day LIBID rate

Security and liquidity benchmarks are already intrinsic to the approved treasury strategy through the counterparty selection criteria and some of the prudential indicators. Benchmarks for the cash type investments are set out below and these will form the basis of reporting in this area. In other investment categories appropriate benchmarks will be used where available.

Liquidity – This is defined as “having adequate, though not excessive cash resources, borrowing arrangements, overdrafts or standby facilities to enable it at all times to have the level of funds available to it which are necessary for the achievement of its business/service objectives” (CIPFA Treasury Management Code of Practice). In respect of this area the Council seeks to maintain:

- Bank overdraft - nil
- Liquid short term deposits of at least £5m available with a week’s notice.

The availability of liquidity and the term risk in the portfolio can be benchmarked by the monitoring of the Weighted Average Life (WAL) of the portfolio – a shorter WAL would generally embody less risk. In this respect the proposed benchmark to be used is:

- WAL benchmark is expected to be 0.45 years.
- Security of the investments – In context of benchmarking, assessing security is a much more subjective area to assess. Security is currently evidenced by the application of minimum credit quality criteria to investment counterparties, primarily through the use of credit ratings supplied by the three main credit rating agencies (Fitch, Moody’s and Standard and Poor’s). Whilst this approach embodies security considerations, benchmarking levels of risk is more problematic. One method to benchmark security risk is to assess the historic level of default against the minimum criteria used in the Council’s investment strategy.

The Council’s expected security risk benchmark from its budgeted investment strategy is:

- 0.008% historic risk of default when compared to the whole portfolio which equates to a potential loss of £1,168 on an investment portfolio of £14.6m. In addition that the security benchmark for each individual year is:

	1 year	2 year	3 year	4 year	5 year
Maximum	0.30%	0.30%	0.30%	0.30%	0.30%

These benchmarks are embodied in the criteria for selecting cash investment counterparties and these will be monitored and reported to Members in the Investment Annual Report. As this data is collated, trends and analysis will be collected and reported
